

XTREME PIVOT TABLE ONLINE COURSE

The Most Comprehensive Excel Pivot Table Course!

Now You Can Leverage The Most Powerful "Drag and Drop" Tool For Using Microsoft Excel To:

- Quickly and Accurately Analyze Tons of Data With a Couple Clicks of a Mouse, WithoutHaving to Memorize and Use Excel Formulas or Macros...
- EasilyCreateProfessionalInteractiveCorporateDashboardsandPresentations That Update in Seconds Without Having to Update Complicated Formulas...
- Maximize Your Potential with Excel and Become the Go-To Person At the Office for Data Analysis, Organization, and Presentations...
- And MANY more benefits that you'll discover by joining more than 14,000 people who have already taken our comprehensive video training course called Xtreme Pivot Tables.

If you want to leverage the power of Microsoft Excel to take your career in a new direction, create professional looking data summaries that automatically update with "drag and drop" ease...

... or if you want the ability to impress your boss, co-workers and senior management who don't know Excel's true power... then read on.

While other people are stuck memorizing, creating, and re-creating hundreds of formulas and wasting hours of their time constantly reorganizing columns and rows ... you'll race ahead of them.

You'll be showing off your latest Excel creation by leveraging one simple but powerful tool: The Excel Pivot Table.

No matter if you are a Beginner or an Advanced user of Excel, you are sure to benefit from this course which goes through every single tool that is available in an Excel Pivot Table. The course is designed for Excel 2007, 2010, 2013 or 2016. There are 14 different chapters so you can work on your weaknesses and enhance your strengths. Each chapter was designed to improve your Excel skills with extra time saving Tips and real life business Case Studies.

In no time you will be able to analyze lots of data and tell a story in a quick and interactive way, learn how to build stunning Dashboards and get noticed by top management & prospective employers.

I've created this comprehensive online course that will show you everything you need to know to leverage every ounce of the incredible power of this tool. It's called:

The Xtreme Pivot Table Course

John Michaloudis

Chief Inspirational Officer & Pivot Table Guru

John Michaloudis has taught over 25,000 students via his in depth online courses, has an Excel blog with free Excel tutorials which reaches over 45,000 subscribers and interviews leading Excel experts around the world to share their insights on his Excel Podcast show which gets 5,000 downloads per month! His goal is to pass on his Excel knowledge to over 1 million people by 2020!

Feel free to get in contact with me directly via email if you have any questions about this course, I am happy to hear from you any time: john@myexcelonline.com

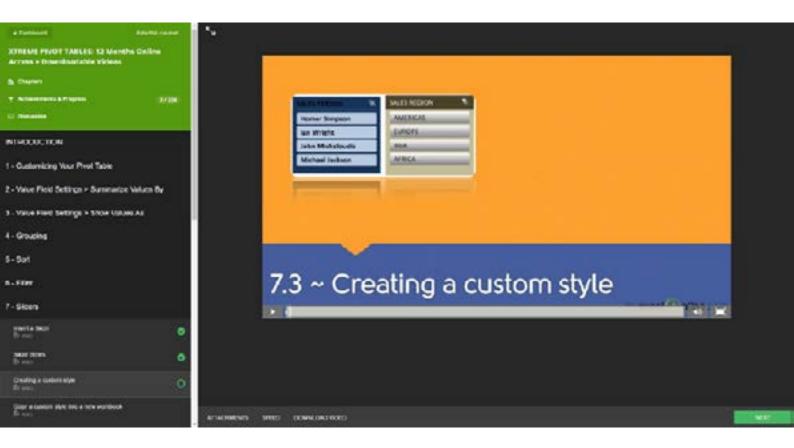

Here's what you'll get once you're inside the student area...

Here is a quick overview summary of all the awesome features that you will receive for signing up to **The Xtreme Pivot Table Online Course:**

- Lifetime Online Access + Course Updates so you can view at any time and are up to date with new Pivot Table features
- **14 chapters** ranging from Analysis, Slicers, Pivot Charts, Conditional Formatting & Macros with over 200 videos and 10+ hours of content
- **Downloadable Excel Workbooks** so you can follow along & practice or skip directly to the **answers**
- Downloadable MP4 Videos to keep on your desktop and view the course offline or when travelling
- **Certificate of Completion** to enrich your CV/Resume as well as add to your LinkedIn profile 30 Day Money Back Guarantee so you can view the course without any risk
- 7 x Limited Time Bonuses (\$1,193 in value) which include, Downloadable Webinar Replay Video, Dedicated Email Support, Power Pivot Intro Online Course, Power Query Intro Online Course, Power Pivot Excel e-book, Time Saving Resources and Course Discounts!

Xtreme Pivot Tables is Delivered to you Inside a Cutting Edge, Easy to Navigate Learning Management System

Once you enroll in the course you immediately get access to our leading edge course management software. This way of delivering the training helps to make your learning more organized and keeps you focused.

Each video tutorial is around 3 minutes each, making it easier to focus on each concept that is taught. You can pause, rewind, speed up and rewatch the tutorials as many times as you like.

You'll be equipped with your own personal student dashboard, an achievements and progress tracker, viewed/remaining tutorials and course author discussions if you need any help.

You won't have to purchase anything additional to participate in the course, everything you need is provided!

These workbooks are the same ones I work with in the video training.

You'll be able to follow me, step by step, and see first-hand how I use the various Pivot Table tips, tricks, and strategies to create professional reports.

Of course you'll also be able to download and keep all the Excel workbooks that are shown on each training video to your desktop or hard drive! You can take the workbooks with you anywhere, office, home or even while traveling.

You can follow along LIVE and practice the new tricks and tactics you'll discover, which will build your confidence when using Excel.

You'll also be able to keep and use them as a reference tool that you can go back to later and refresh your memory (hey, we never remember everything the first time we see it, right?).

Online access is great but how about when you are unable to connect to the internet or don't have WiFi access?

Problem solved!

Download all the videos from this course to your computer so you can watch offline, in transit or whilst you are travelling.

The downloadable videos are in HD quality mp4 format and you can keep them on your hard driver & re-watch the tutorials whenever you want!

When you enroll, you get LIFETIME online access, from anywhere in the world, home or office ... 24 hours a day, 7 days a week, 365 days a year, year after year...

New video tutorials will be updated annually so you are guaranteed to be up to date with any of Excel's new Pivot Table features.

These are High Definition quality videos viewable from your PC, Laptop, Tablet or mobile phone.

These tutorials are available to watch at your own pace, so you can get maximum value out of them.

Once you complete the Xtreme Pivot Tables course, you will receive a 'Certificate of Completion' that you can print, frame, and use to enrich your resume/CV.

This Certificate is also available to put within your LinkedIn profile & achievements section for other professionals to see!

I wouldn't dream of letting you enroll in this course without taking all of the risk out of your purchase decision.

I am so confident that you will get lots of value from this course that you can take it for the full 30 days, study it and apply it to your work to see the results.

If you're not 100% satisfied, I am more than happy to refund the full purchase amount, even if it's midnight on the 30th day!

So give the course a good go, watch all the videos, download the workbooks and ask me any questions during 30 days!

If you don't feel you'll be able to master the craft of using Excel Pivot Tables to accomplish your objectives, then contact us and we will refund you your money, no questions asked and no hard feelings as that is our motto with all of the training courses that we offer!

You literally have nothing to lose. Fair enough?

- ⊘ Learn How to Create Relationships, Add Measures, DAX Formulas & more...
- ⊘ Lifetime Online Access
- \odot Downloadable Workbooks to practice
- ⊘ Downloadable HD Video tutorials

How Much Does It Cost?

Right now I'm offering LIFETIME online access to The Xtreme Pivot Table Course for USD \$297.

Online training is high in demand in the current corporate environment as it allows you to receive training at a much lower price as compared to the traditional live in-person seminars.

These seminars would usually cost you more than \$2,000, not to mention the additional travel costs to and from, cold conference rooms and distractions from students who are on a different learning level than you.

Let me ask you. How much of the content would you retain from these live seminars?

Study reveals that you are 90% more likely to retain what you learn from online training v live seminars as you are more likely to:

- Ask more questions as you don't feel like sounding stupid in front of a large crowd;
- Learn at your own pace depending on your Excel level and not someone else's level;
- Have less distractions as you can watch the tutorials from any device and any place, including the comfort of you home;
- Practice what you learn straight away using the downloadable workbook or applying what you learn to your real life work files;

This Is A Limited Offer So Get Access To This Course & Bonuses Now Before It's Over

Frequently Asked Questions.

Who should take this course?

- New users, beginners, intermediates and advanced Excel users. Anyone who wants to use Excel to create more than just "columns and rows."
- Professionals working in the corporate world or government sectors who want to leverage Excel for increased productivity, accurate data management and more.
- People who want to change career and apply for a new job.
- Small business owners who want an easy way to manage their business finances, accounting reports, and other documents.
- People who work with large volumes of data and want to quickly sift through, analyze, and chart the data in a professional way.
- People who prepare reports that require constant updating with new data on a daily/weekly/ monthly basis.
- Import data into Excel from an external source e.g. ERP System like Oracle, SAP, PeopleSoft,
 company database, Access, Web etc...and need to quickly & accurately analyze that data and extract valuable information

What version of Excel do I need?

This course was recorded using Excel 2010 but all the concepts taught are compatible with:

- Excel for Windows: 2003*, 2007*, 2010, 2013, 2016
- Excel for Mac: 2011*, 2016
 - * Slicers and some Pivot table calculations are not available in these versions

Can I Get CPE Credits for this course?

Yes you can!

• The Xtreme Pivot Table course qualifies for 16 CPE Credits (NASBA Approved) and this

is available via my Excel partner's website - Jeff Lenning at ExcelUniversity.com.

Click on this link to get access to this CPE course!

What am I going to get from this online course?

- Over 200 short video tutorials which amount to almost 10 hours of Excel-specific training and accessible online **FOREVER!** (Plus all of the items described above)
- You will be able to easily analyze lots of data, tell a story in a quick and interactive way, and learn how to build stunning Dashboards while getting noticed by top management and prospective employers. (Plus MUCH more...!!!)
- Increase your Excel skills dramatically, which will make you stand out from your peers and allow you to grab fresh new opportunities.

What payment methods do you accept

- We accept all major credit cards like Visa, MasterCard, American Express, Discover etc as well as PayPal
- The course fees are shown in USD.
- Get in contact with us if you want to pay via bank transfer or check at courses@myexcelonline. com
- If you need a Tax Invoice for your records, then this can be emailed to you.
- We are happy to complete any paperwork your company or government may require

Can I purchase the course for a large number of staff?

Absolutely!

Please contact us to discuss our specialized options for multi-user discounted pricing at: john@myexcelonline.com. We can also provide the course to integrate into your company's own Learning Management System.

Now, let's hear what some of my students have said about this course...

Finance Assistant

Short, precise, clear and easy to understand videos that includes every aspect of pivot table. When I was 50% complete with the course my boss started recognizing my Excel skills. I started volunteering to do complex reconciliations, analysing large data sets and solving colleagues' problems. I am now regarded as the Excel guru at the UNDP compound in Zimbabwe.

Recently I was selected from a group of 8 finance team as the acting Finance Associate. I am now the person responsible for reviewing, formatting and designing all the reports before they are sent outside. The course has taken my Excel skills to another level. My confidence has increased significantly!

I have been a CPA for a long time and do a lot of forensic work as well as other types of analysis work. Without a doubt, this course has been the best training I have ever received and for several very important reasons:

1. It dissects a very daunting concept of pivoting data and serves it in pieces that are easily digestible and reasonable so that the concept sticks.

2. The presentation is very well done with a pace that makes learning this tool pleasurable.

3. The student learns the subject matter at depth with a focus on the applicability to our particular profession.

All I can say is well done.....bravo.....standing ovation. I will be enrolling other staff members at my firm in this course because it is a tool that will reap great rewards :)

Business System Analyst

 \star \star \star \star

This is one of the most comprehensive Excel courses I've been on. Great exercises that go through step by step and easy to follow. Recommended to any Excel learners wanting to advance their skill.

> Great course! Learned a lot and had fun doing it. Skills I've learned will be invaluable to current and future roles!

Stephanie Sedivy Channel Operations Manager

Michael McCurley Credit & Collectiona Manager

 $\star\star\star\star\star$

This course rocks, period. I have a lot of experience with excel (even back to Lotus 123) big macro VBA enthusiast, but I had not truly gotten my feet wet with pivot tables. This course was great!

I bought the downloadable version and put it on my laptop to be able to watch the videos anytime, anywhere. Worked very well for me. Within the first two weeks after starting the course, I put together three sets of reports using Slicers and Pivot Charts.

Management was Very impressed! Once you know the features, and John explains them very well, they are almost slam dunk. This will take your Excel skills to the next level.

Michelle Gravett Finance Your Excel Pivot Table course is easy to understand and I found that by downloading your example spreadsheets and using them as I followed the videos made it easier for me to know how to use the Pivot Table features.

I was not aware of all the things one can do with Excel Pivot Tables until I did this course.

A coworker of mine asked me to help her group information in a spreadsheet that she does on a monthly basis. She told me it used to take her hours to Group the information together, as she had to do it manually.

I showed her how to Group the information using a Pivot Table. It takes minutes to do this. My co-worker was so happy I showed her how to do this. Now she wants me to teach her the skills I acquired from your course!

Loved this course! It is broken down into easy to absorb materials and teaches you step by step so you can follow along and learn the material. It is like having a private tutor that you can access at your convenience.

Highly recommend this course to anyone who is interested in learning Excel!

Through the years, I have taken Pivot Table course and read books on the topic. This webbased course is the most comprehensive I've experienced. John shows every screen and key stroke associated with the procedure or topic under discussion.

The organization of the course with its table of contents allows the course to be a reference guide. This is a fantastic course with a great instructor.

I have heard of the benefits of pivot tables from my colleagues in the financial world for many years, but only dabbled with them :)

I am blown away by the savings in time and space and how much more manageable my data has become. This course allowed me to reduce a 110 worksheet program tracking spreadsheet taking up some 25Mb to a sleek 3Mb spreadsheet of 33 pages. AND my colleagues can now understand how the spreadsheet works!

I can now do my end of month reporting in 1/2 a day instead of 2 days. A damn fine investment. Thanks John for developing such a great course!

Olwyn Bourne Sales Team leader

This course made a difference to my job after only a few modules. Even though I was self-taught I still thought I was very good. It didn't take me long into this course to realise how many functions within excel I was not aware off. Reports I had previously spent 4 hours creating now take me minutes (seriously). I would recommend this course to anyone who works in Excel. The price is so reasonable. After only 2 weeks progress I was presenting more impressive reports, as a result, without hesitation my employer offered to reimburse the course fee.
